

Erasmus+ project, TRAVEL, LEARN AND TASTE THE WORLD 2023-1-PL01-KA210-VET000152029

Erasmus Ka2
Travel, learn and taste the world

In 2023, the College of Food Industry "Elena Doamna" from Galati became a co-partner in the Erasmus+ project "Travel, Learn and Taste the World"- 2023-1-PL01-KA210-VET000152029, with coordinating school from Poland and Portugal as partner.

The main goal of the project is "cooperation in the field of promoting cultural heritage, national and regional cuisine, as well as creating vocational skills in the field of gastronomy and communication in English". In these conditions, the main advantages of this project were communication in English of the participants, and the acquisition of professional skills specific to the gastronomic field through cooperation regarding the promotion of the cultural and culinary heritage of the host countries.

During the week of May 20th -24th 2024, the international meeting of the Erasmus+ project took place where teachers and students from the Romanian college, six teachers and six students from Poland and Portugal had been involved within the workshops organized in the laboratories of the Faculties in Galati, in the school's biochemistry and microbiology laboratories, but also in the school's pilot microproduction stations.

GASTRONOMY Laboratory

Also within the project, calendars for the year 2025, a culinary dictionary-recipe, etc., were created with the help of the online graphical tool **CANVA**, which can be considered learning outcomes.

The thematic activities within the project were related to fish gastronomy and visiting Tulcea, the Delta Museum, The Fishery village and a walk on the Danube's banks visiting some tourist attractions activities that delighted our guests.

The **TRAVEL, LEARN AND TASTE THE WORD** project represented for the students of our school, on the one hand, the opportunity to acquire new professional and linguistic skills at the European level, and on the other hand, the broadening of the cultural and professional horizon, both types of acquisitions facilitating them easier integration on the Romanian, European and, why not, international labor market.
